

VINTAGE TUBE OVERDRIVE VT911

Classic Vacuum Tube Overdrive

Thank you for showing your confidence in us by purchasing the BEHRINGER VINTAGE TUBE OVERDRIVE VT911. This high-quality classic tube overdrive pedal is based on a hand-selected BUGERA 12AX7B vacuum tube. Get a whole tube amp in a pedal and take off with anything from warm blues overdrive to heavy distortion.

1. Controls

- 1 Use the **9V** connection to plug in a 9 V power supply.
- 2 The $\frac{1}{4}$ " TS **OUT** connector sends the signal to your amp.
- 3 Use this $\frac{1}{4}$ " TS **IN** connector to plug in the instrument cable.
- 4 The **LEVEL** control adjusts the output level.
- 5 The **TONE** control allows you to adjust the overall sound.
- 6 The **DRIVE** control adjusts the amount of distortion. Extreme DRIVE settings result in a more compressed sound with less dynamics.
- 7 Use the footswitch to activate/deactivate the effect. The status LED beneath the LEVEL control illuminates when the effect is activated.
- 8 The BUGERA 12AX7B vacuum tube is placed here.

The **SERIAL NUMBER** is located at the underside.

2. Safety Instructions

Do not use near water, or install near heat sources. Use only authorized attachments/accessories. Do not service product yourself. Contact our qualified servicing personnel for servicing or repairs, especially when power supply cord or plug is damaged.

3. Warranty

Please register your new BEHRINGER equipment right after your purchase by visiting <http://behringer.com> and read the terms and conditions of our warranty carefully.

4. Specifications

In
